Summary

Aspiring DevOps Engineer and **CS Undergraduate** specializing in **Linux (Ubuntu)** environments, **Python automation**, and **Bash scripting**. Experienced in building scalable deployment workflows using **Git/GitHub** and managing infrastructure. Focused on optimizing backend systems through **containerization (Docker)**, automated task scheduling (**Cron Jobs**), continuous monitoring, and **CI/CD methodologies** to maximize system reliability.

Skills

OS Scripting: Linux (Ubuntu), Bash Scripting, Python (Automation)

DevOps Cloud: Git/GitHub, Docker, Automation Scheduling (Cron Jobs)

Core Technical: SQL, Web Hosting Deployment, System Monitoring

Projects

Autonomous System Health and Disk Management Bot

- **Developed a Python** automation tool to monitor disk storage and prevent server downtime through proactive threshold alerts.
- **Automated** data recovery by configuring logic to auto-compress and **archive directories (ZIP)** when storage exceeds 80%.
- **Scheduled** background execution using **Cron Jobs** and implemented **I/O logging** to ensure autonomous system auditing.

Linux: Shell Scripting for DevOps Automation

- Developed **Bash scripts** from scratch to automate system tasks using **loops, if/else logic, and exit status handling**.
- Managed **file systems** and **implemented automated file archiving and management** via the Linux CLI.
- Applied test commands and **shell scripting fundamentals** to streamline routine administrative processes in a Linux environment.

Experience

Ataraxy Developers - Rawalpindi

July 2025 – Dec 2025

WordPress Web Development

- Engineered and maintained fully functional WordPress sites (e.g., urbaneterprisespk.com) using Elementor, ensuring technical stability and high performance through routine updates.
- Ensured cross-browser compatibility and mobile responsiveness across all developed platforms.

Certifications

Linux: Introduction to Shell Scripting for DevOps – Coursera

Mar 2026

Files and directories in the **Linux filesystem** – Coursera

Dec 2025

Education

Foundation University Islamabad

Sept 2023 – Present

Bachelor of Science in Computer Science

- Relevant Coursework: Operating Systems, Computer Networks, Object Oriented Programming, Advance Database Management System, Data Structures and Algorithms, Artificial Intelligence, Web Engineering, Mobile Application development (Java)
